WEB DEVELOPER

Energetic junior web developer focused on learning and implementing the latest technologies. Thorough understanding of continuous development models to contribute to the success of web development projects. When I'm not working on my developer skills, my curious mind continues forward by playing sports, hiking, appreciating the arts, staring at the stars, and spending quality time with friends and family.

TECHNICAL KNOWLEDGE

HTML	CSS	Javascript
jQuery	Underscore	Handlebars
Bootstrap	Git	Github
React.js	Backbone.js	Npm
